

HYDRAULIC PIPE SQUEEZER

160 - 250 mm

The hydraulic pipe squeeze-off tool is used for emergency, temporary shutting off the flow in polyethylene gas and water pipelines. The squeezing force is generated by a hydraulic cylinder driven manually by a lever.

CONSTRUCTION | Galvanized steel body

PRESSURE RANGE

GAS: up to 1,0 MPa

WATER: up to 1,6 MPa

DIAMETER RANGE | 160-250 mm

SDR RANGE | 11; 17;

ACCESSORIES

- end stops preventing excessive squeezing of polyethylene pipes for all diameters in the range of 160-250 mm - 2 sets.
- bottom bar - 1 pc
- cylinder driving lever with a wrench for the release valve
- securing bolts that prevent releasing the bars
- instructions for use

WYMIARY

- height x width x depth: 1030 x 510 x 180 mm
- weight: 122 kg
